

Benny the Bullybeastie

The people in a quaint little town below the mountain, vanished one night, without leaving a trace or making a sound. A handsome prince and his two beautiful cousins are very sad and fear for the welfare of the townsfolk. The prince knew that Benny the Bullybeastie was the cause of all the misery. Prince Matthew Morena is explaining to the little princesses where their friends have gone. A bullybeastie named Benny one day appeared on the streets of the town. From the moment of his arrival he was mightily feared by all. He bullied the townsfolk endlessly. The streets were no longer safe. The children had to hide in their houses, lock their doors and crawl under their beds. The mayor held a meeting and a decision was made to creep away during the night and leave Benny behind before some disaster occurred. Benny had never learned to get along with others and displayed great anger at the rejection of his advances. When he awoke and discovered he had been deserted by the townsfolk his first reaction was rage, then fear on being alone. Only then did Benny realize that his disregard for the rights of others, his uncontrollable anger and his senseless behaviour were the ingredients that were preventing him from being accepted and loved. Benny set out in search of the townsfolk. He faced many hardships in his travels. This gave him time to reflect on his behaviour and realize how much we require the love and understanding of others.
