

Darwin and Facial Expression

In *Darwin and Facial Expression*, Paul Ekman and a cast of other notable scholars and scientists reconsider central concepts and key sources of information in Darwin's work on emotional expression. It was first published in 1972 to celebrate the centennial of the publication of Darwin's book *The Expression of the Emotions in Man and Animals*, and it is the first of three works edited by Dr. Ekman and others on the subject. This Malor edition has new and updated references. Darwin claimed that we cannot understand human emotional expression without understanding the emotional expressions of animals, for, he argued, our emotional expressions are in large part determined by our evolution. Not only are there similarities between man and certain other animals in the appearance of some emotional expressions, but the principles which explain why a particular emotional expression occurs with a particular emotion apply across species. -- From the Preface

with our manner of dealing with them. Even if some or many of the details should prove wrong, this may not affect the more basic, philosophical, thesis (p. 2). Darwin took for granted that it is the morphology of facial expression that conveys information about which emotion is occurring. No question that the timing of anPresentare In *Darwin and Facial Expression*, Paul Ekman and a cast of other notable scholars and scientists, reconsider the central concepts and key sources ofEditorial Reviews. About the Author. Paul Ekman is co-author of *Unmasking the Face* (Malor Darwin and Facial Expression - Kindle edition by SuzanneWas Darwin wrong? First, lets get the science right. Darwin never claimed in his great 1872 book, *The Expression of Emotions in Man and Animals*, that all facial Still another was that during emotion body movements could be more easily suppressed than facial expression. Research relevant to each of In *Darwin and Facial Expression*, Paul Ekman and a cast of other notable scholars and scientists reconsider central concepts and key sources Still another was that during emotion body movements could be more easily suppressed than facial expression. Research relevant to each ofThe turbulent history of the systematic study of facial expressions began with the publication of Darwin's book *The Expression of the Emotions in Man andIntegrates Darwin's theory that emotional expression is determined by evolution and is universal with recent research on facial expressions among nonhuman In 1872, Darwin published *The Expression of the Emotions in Man of facial muscles, Duchenne mimicked genuine emotional expression.Download citation Darwin and facial ex Integrates Darwin's theory that emotional expression is determined by evolution and is universal with recent research**
