

Motivation in Education: Theory, Research, and Applications

Informing readers about major motivational theories and related research, this thought-provoking book includes an overview of metatheoretical perspectives, expectancy and efficacy beliefs, attribution theory, social cognitive theory, goal theory, intrinsic motivation, values and affect, and social-conceptual influences such as schools, classrooms, and families. Offering intensive conceptual details of different theories, it describes and applies the most recent advances in motivation theory and research to a classroom context. Sketches metaphorical and metatheoretical approach to motivation, providing a way to organize theories of motivation at a conceptual level. Strongly emphasizes expectancies and efficacy central constructs in motivation. For educators.
