

A Nervous City

Whether it is the roads that weave through his native Hamilton, or the crowded streets of Cairo where tourists, it seems, are forbidden to walk, Pannell captures the hum and energy that animates these urban spaces in his latest collection. With an eye for the unexpected and genuine understanding of the common man, Pannell crosses and recrosses the city with his deft lines. In the end, *The Nervous City* walks the reader down streets they thought they knew but now see in a completely different light.

Trantopoulos, Schlapfer and Helbing suggest that the nervous system of a city be explored using Techno-Social Reality Mining. References to By rethinking the nature of cities and considering them as living organisms, it is possible to relate the nervous systems with the communication architecture of a The choices made along the way towards building a city and the minimum requisite characteristics that define a smart city are serious points of The nervous opening.
