

An easy-to-use resource for professionals and parents, this book provides fun and practical ideas to help motivate and extend communication and play skills in children with autism with the support of pictures. The book describes how picture scripts can help facilitate play and learning and provides 40 photocopiable scripts across a range of different activities such as drawing, cooking, using construction toys, imaginative play, arts and crafts, and life skills. Tasks are presented in small manageable step-by-step picture sequences and support a range of skills including following instructions, increasing independence, comprehension, story-telling and choice-making. Readers can print copies of the scripts from the CD-ROM that accompanies the book. Ideal for special education teachers, early years practitioners, speech and language therapists, occupational therapists, and parents, this will be an excellent tool for any classroom, home or therapy setting.
