

George in London

A young man, not yet out of his teens, sets off on a trip across the ocean to London in 1751. His aim is simple: to make his fortune. To transform himself from the no-account, tradesman surveyor younger son of a middling Virginia tobacco planter to a titled, monied success in the sprawling capital of the mother country. His only allies in this quest are an African American sailor and a fashion-obsessed German Baron. *George in London* tells of this young mans remarkable adventure in the mighty mid-18th century city of London. His story is the tale of every young man on the make, trying to raise himself up by his own bootstraps. Its also the story of his encounters with a beautiful French countess and his struggles to win her heart. Will he succeed in the mother country? Will the young man and the countess retire to their country estate after taking London by storm? Get a copy of *George in London* and find out!
